Hi George,

We have a big street light issue going on by where we live.

I have cc'd the following people;

Two female residents of CD 13 affected by this, Privacy | Privac and Privacy | Privac.

Adriane Hoff and Steve Bae from WCKNC.

Erik Bruner our SLO officer

1) Right next to the elementary school the street light is out on council. That needs to be replaced with something nice and bright as soon as possible. It's been getting dark early and myself and others have been using the street to walk on and not the sidewalk due to the homeless guy being there and it being extremely dark. (Hopefully this can also help deter the homeless man who resides there who recently was indecent to me and Privacy | Privac by having his pants down to his ankles and who had defecated on the sidewalk there (separate occasions). I've talked to him about getting a tent but he says that he owns the area and refuses to use a tent. He also threw garbage all over that sidewalk and called it art.)

2) Almost all the streetlights on Vermont between council and 1st are out (except one near the middle school and 1st street). The sidewalks are extremely dark. Is power out on that block?

What can be done to get these light bulbs replaced and checked out ASAP. We would like to have our neighborhood be as safe as possible, and the lighting would be a big help.

Thank you,
